**Academic Staff.**—The total teaching staff, including part-time staff, increased from 9,373 to 9,441 between 1950 and 1951. This increase, in conjunction with the decreased enrolment, brought the ratio of teachers to staff more in line with the experience of pre-war years. By the addition of one-half of the part-time staff to the full-time staff, on the basis of equivalence in instruction, there were eight students for each teacher in the pre-war years while the present teaching load represents nine students to one teacher.
