Section 3.—Provincial Distribution of Production

Substantial increases in net value of output were shown by all provinces and territories between 1946 and 1950. The largest percentage gain, which amounted to 82 p.c., was recorded by Ontario. British Columbia and Alberta followed with advances of about 73 p.c. and 69 p.c., respectively, in the same comparison. Quebec showed an increase of 61 p.c. and value of output in Manitoba gained 51 p.c. The Atlantic Provinces and Saskatchewan recorded more moderate increases.

3.—Net Value of Production, by Province, 1946-50

Province	1946	1947	1948	1949	1950

¹ Newfoundland data excludes agriculture, fisheries, trapping and fish processing. ² Forestry and construction figures for the Yukon and Northwest Territories are included with British Columbia.

Ontario, having the largest population and a well diversified economy, contributed nearly 43 p.c. of the total commodity production in 1950. Quebec's share amounted to 26 p.c. and British Columbia contributed the third largest share of 9 p.c.
