

## Subsection 5.—Dairying

**Milk Production.**—Milk production in 1952 amounted to 16,784,982,000 lb., an increase of 361,400,000 lb. over the previous year but a considerable reduction from the high point of 17,628,610,000 lb. reached in 1945. The proportion of the total milk production used for factory-made dairy products increased from 51.1 p.c. in 1951 to 52.2 p.c. in 1952, and the proportion sold in fluid form showed a fractional increase. Milk used for all purposes on farms (home consumed, manufactured and fed) declined from 23.1 p.c. of the total in 1951 to 22.0 p.c. in 1952.

**20.—Production and Utilization of Milk, by Province, 1949-52, with Totals for 1945-52**

NOTE.—Figures for years prior to 1949 will be found in corresponding tables of previous editions of the Year Book.

Province and Year	Used in Manufacture		Milk Otherwise Used			Total Milk Production '000 lb.
	On Farms	In Factories	Fluid Sales	Farm-Home Consumed	Fed on Farms	
	'000 lb.	'000 lb.	'000 lb.	'000 lb.	'000 lb.
