<sup>1</sup> Fluctuations in apparent per capita flour consumption are partly due to the fact that complete data on flour inventories in all positions are not available. <sup>2</sup> Not available pending revision of intercensal estimates. <sup>3</sup> Includes soybean flour. <sup>4</sup> Exclusive of Newfoundland. <sup>5</sup> Includes process cheese. <sup>6</sup> Includes cream expressed as milk.

**Consumption of Meats.**—Production of meats from slaughter, total supply, distribution and per capita consumption of meats and lard are shown in Table 44. All estimates are on a carcass-weight basis except canned meats which are in terms of product.

### 44.—Supply, Distribution and Consumption of Meats and Lard, 1948-52, with Average for 1935-39

NOTE.—Estimates for 1942-51 are not strictly comparable with those for 1952, since revisions for those years necessitated by the 1951 Census of Agriculture have not yet been completed.
