¹ Includes duplication where farms had tractors under 15 h.p. and 15 h.p. or over. data for the Yukon and Northwest Territories.

Farm Electrification.—Slightly more than one-half of the farms in Canada reported electric power. Ontario had the largest proportion with 73 · 8 p.c., followed by Nova Scotia with 71 · 1 p.c., British Columbia with 68 · 8 p.c., and Quebec with 67 · 1 p.c. Saskatchewan had the smallest proportion with only 16 · 3 p.c. Power line was reported to be the source of power on over 90 p.c. of the farms reporting electricity in all provinces except Saskatchewan and Alberta. In Alberta, 60 · 1 p.c. of the farms reported power-line source, 13 · 2 p.c. wind electric, and 28 · 1 p.c. other sources. In Saskatchewan, 31 · 9 p.c. of the farms reported power line, 34 · 4 p.c. wind electric, and 35 · 8 p.c. other sources.
