

Table 11 presents, for the year 1950, detailed statistics of the individual industries under which all industrial plants in Canada are classified. In interpreting these figures it should be remembered that they do not refer to individual products but to all the products made in an industry. For example, the value of production of the confectionery industry amounting to \$104,853,748 does not imply that this was the value of confectionery produced. What it means is that the firms whose principal product is confectionery had a value of production of \$104,853,748. This figure, in addition to confectionery, includes all the subsidiary products made by these firms, such as ice cream, which was valued at \$2,214,689, and bread and other bakery products valued at \$2,457,312. Confectionery is also produced as a subsidiary product by firms credited to other industrial classifications. The quantities and values of the principal individual commodities produced are given in Table 12. Commodities produced in small quantities are not included but the list covers approximately 75 p.c. of total production.

11.—Principal Statistics of Individual Manufacturing Industries, classified on the Standard Classification Basis, 1950

Group and Industry	Estab-lish-ments	Em-ployees	Salaries and Wages	Cost of Materials	Net Value of Products	Gross Value of Products
	No.	No.	\$	\$	\$	\$
Food and Beverages—						
Bakery Products—						
Biscuits.....	47	6,315	10,891,996	30,328,324	33,801,487	64,934,603
