^{15,000} watts during daytime; 1,000 watts at night.

CBC International Service (Shortwave).—The International Service, inaugurated on Feb. 25, 1945, is operated by the CBC on behalf of the Canadian Government. Its aim is to tell the people of other countries about Canadian life and thought and to help unify the western world in the defence of freedom.

The International Service, now in its ninth year of operation, has grown to meet the requirements of Canada's expanding interest and influence abroad. The two 50,000-watt transmitters at Sackville, N.B., are linked by approximately 600 miles of land lines with studio and program headquarters in the Radio Canada Building, Montreal, Que., from which programs are broadcast daily in English, French, German, Dutch, Danish, Norwegian, Swedish, Finnish, Italian, Spanish, Portuguese, Czech, Slovak, Russian, Ukrainian and Polish. With technical facilities transmitting a signal unequalled in Europe by any other from the North American Continent, the International Service has succeeded in reaching increasingly large audiences in Europe, Central and South America, the Caribbean and the South Pacific area.

More than 200,000 letters have been received from listeners in all parts of the world attesting to the strength of the International Service signal and to a wide interest in Canada and Canadian programs. Many listeners request specific

^{21,000} watts during daytime; 250 watts
