## Subsection 2.—Young Adult Offenders (16-24 Years)

Young men and women from 16 to 24 years of age formed 40.0 p.c. of the criminal population who committed indictable offences in 1952, although they comprised only 19.8 p.c. of the total population of 16 years of age or over. As this age group includes some of the most daring offenders, who may be already experienced criminals, as well as first offenders likely to be turned from crime by further education and training, it seems worth while to give consideration to offenders in this group as distinct from offenders in the older age groups.

Almost 73 p.c. of the young offenders were tried in three provinces—Ontario (39·8 p.c.), Quebec (20·9 p.c.) and British Columbia (11·7 p.c.);  $45\cdot6$  p.c. of them were still under 20 years of age.
