Totals, Leading Industries3	3,031	71,303	219,867,186	531,640,815	455,674,423	1,004,878,68			
Totals, All Industries	4,225	92,667	283,530,976	751,011,248	556,172,312	1,332,481,80			

¹ In 1952, gross value of products was replaced by value of factory shipments; see text, p. 633. ² Excludes non-ferrous metal smelting and refining, sugar refining, bridge building and structural steel and distilled liquors, which are leading industries but for which figures are confidential and cannot be published. ³ Excludes non-ferrous metal smelting and refining, sugar refining, and distilled liquors, which are leading industries but for which figures are confidential and cannot be published.

Section 2.—Manufacturing Industries in Urban Centres

The prosperity of most of the cities and towns of Canada, especially in the east, is intimately connected with their manufacturing industries, which provide employment for a large proportion of the labour forces. In the west the cities are more largely distributing centres, though manufactures are increasing rapidly there also.

Table 8 indicates the extent to which the manufacturing industries of Canada are concentrated in urban centres and shows, by provinces, the proportion of the gross manufacturing production contributed by cities and towns having a gross production of over \$1,000,000 each. In the more highly industrialized Provinces of Ontario and Quebec such cities and towns accounted for 91 p.c. and 94 p.c. in 1951, and 90 p.c. and 94 p.c. in 1952, respectively, of the total manufactures for those Provinces, while in the Atlantic Provinces and British Columbia, where sawmilling, fish packing, and dairying are leading industries, the proportions were 72 p.c. and 57 p.c. in 1951, and 72 p.c. and 59 p.c. in 1952, respectively. In the Prairie Provinces manufacturing is confined largely to a few urban centres.
