

## 1.—Net Value of Production, by Industry, 1948-52

NOTE.—Net production represents total value under a particular heading, less the cost of materials, fuel, purchased electricity and supplies consumed in the production process.

Industry	1948 <sup>1</sup>	1949	1950	1951	1952
	\$	\$	\$	\$	\$
Agriculture.....	2,045,693,000	2,019,279,000	1,883,036,000	2,653,678,000	2,467,166,000

## Section 3.—Per Capita Net Value of Production

The rapid advance since the end of the War in the total net value of commodity production was accompanied—1946 to 1952 inclusive—by a 17-p.c. increase in population and a 10 p.c. increase in the labour force.

The national per capita net value of commodity production rose from \$535 in 1946 to \$965 in 1952 (exclusive of Newfoundland), an increase of 80 p.c. As wholesale prices rose by around 63 p.c. during the same period, a 'real' advance in per capita output is indicated. Compared with 1951, the value of per capita output in 1952 increased by about 2 p.c.
