

9.—Quantity and Value of Gold Produced by Province 1945-54

NOTE.—Values are calculated at world prices in Canadian funds. Figures for 1862-1910 are given in the 1916-17 Year Book, pp. 268-269; for 1911-23 in the 1939 edition, pp. 336-337; and for 1929-44 in the 1946 edition, p. 332.

Lead.—Estimated lead production in 1954 amounted to 218,495 tons, an increase of 13 p.c. over 1953. The 1954 total included the lead in base bullion produced in Canadian smelters and the computed recoverable content of ores and concentrates exported. British Columbia accounted for 79 p.c. of the total, and its output moved up from 148,817 tons in 1953 to 171,768 tons in 1954. The Mackeno Mine in Yukon Territory and its output added to that of the United Keno Mines brought the total for the Territory to 16,883 tons. In Quebec the total production for the Province declined about 15.4 p.c. Nova Scotia's only lead producer increased its output of the preceding year by 14.6 p.c. Total refined lead production was about 166,000 tons. Canadian consumers used about 68,000 tons and 116,409 tons of piglead were exported.
