The sources of coal consumed in Canada in the years 1945-54 are shown in Table 22 and detailed figures of coal made available for consumption in 1953 and 1954 are given in Table 23; the difference between the totals of the two tables in the same year is accounted for by the fact that coal received may be held in bond at Canadian ports and not cleared for consumption until required, and coal received in previous years may be taken out of bond (cleared for consumption) in a later year. Normally the coal made available for consumption is greater than the apparent domestic consumption as coal is landed at Canadian ports and re-exported or ex-warehoused for ships' stores without being taken out of bond but, while remaining in bond at the port, it is available for domestic consumption if required.

22.—Consumption of Canadian and Imported Coal in Canada 1945-54

NOTE.—Figures for 1886-1910 are given in the 1921 Year Book, p. 354; for 1911-28 in the 1939 edition, p. 350; and for 1929-44 in the 1946 edition, p. 349.

¹ The sum of Canadian coal mines' sales, colliery consumption, coal supplied to employees and coal used in making coke, etc., less the tonnage of coal exported. ² Includes small tonnages from countries other than the United Kingdom and the United States. Deductions have been made from this column to take account of foreign coal re-exported from Canada and bituminous coal ex-warehoused for ships' stores. ³ Figures based on estimates of population given at p. 151.
