Section 3.—Civil Aviation Statistics

Ground Facilities.—Aircraft landing areas in Canada are classified in Table 3 by administrative agency. Instrument Landing Systems (ILS), designed to facilitate safe landings under low visibility conditions, have been installed at 20 airports and nine of them are regular ports of call for international commercial air services.

3.—Aerodromes by Province as at July 31, 1957

Note.—An aerodrome is defined by the Air Regulations 1951 as: a defined area on land or water (including any buildings, installations and equipment) intended to be used wholly or in part for the arrival, departure, movement and servicing of aircraft. This table was compiled by the Aeronautical Charts Section, Department of Mines and Technical Surveys. The aerodromes included are in usable condition.
