<sup>1</sup> Coal reaching Canadian ports whether or not it is cleared through customs, exclusive of 64,942 tons of imported briquettes in 1957 and 35,905 tons in 1958.

**Petroleum.**—The upward climb of crude petroleum production in evidence since the discovery of the Leduc field in Alberta in 1947 was halted temporarily in 1958. Decreased demand resulted in a drop of 8.5 p.c. in the quantity produced as compared with 1957, mostly accounted for by Alberta which produced 67.5 p.c. of the total output. In proportion to their lesser output, moderate increases were shown by Saskatchewan, Ontario, the Northwest Territories and British Columbia.

## 25.—Quantity and Value of Crude Petroleum Produced, by Province, 1949-58

NOTE.—Figures from 1936 are given in the corresponding table of previous Year Books beginning with the 1948-49 edition.

Year	New Brunswick	Ontario	Manitoba	Saskatchewan	Alberta	Northwest Territories	Canada
<b>QUANTITY</b>
