1955	38,182	1,298,461	4,142,409,534	10,338,202,165	8, 753, 450, 496	19,513,933,811
1956	37,428	1,353,020	4,570,692,190	11,721,536,889	9, 605, 424, 579	21,636,748,986

¹ For 1924-51, inclusive, the value added by manufacture is computed by subtracting the cost of fuel, electricity and materials from the gross value of products; for 1952 and 1953 the deduction is made from value of factory shipments and for 1954 and subsequent years from the calculated value of production. Figures prior to 1924 are not comparable because statistics for cost of electricity are not available. ² In 1952 gross value of products was replaced by selling value of factory shipments; see text immediately preceding this table. ³ A change in the method of computing the number of employees in the years 1925 to 1930, inclusive, increased the number somewhat over that which the method otherwise used would have given. In 1931, however, the method in force prior to 1925 was re-adopted. ⁴ Newfoundland is included from 1949 but figures for the fish processing industry for 1949 and 1950 are not available for that province and are not included.

Provincial distribution of manufactures is shown for certain years from 1917 to 1956 in Table 2.

2.—Summary Statistics of Manufactures, by Province, Certain Years 1917-56
