1949.....	893	26,401	51,147,475	59,778,187	94,600,066	156,363,321
1951.....	1,173	28,756	66,908,755	87,292,415	120,899,546	210,804,555
1955.....	1,524	31,511	89,239,630	114,448,353	164,876,649	283,147,866
1956.....	1,556	33,432	100,348,480	138,869,722	187,988,792	326,580,013

¹ In 1952 gross value of products was replaced by selling value of factory shipments; see text on p. 626.

Detailed Statistics by Group and Individual Industries.—Table 10 presents detailed statistics for 1956 regarding the individual industries under which all industrial plants in Canada are classified. The industries are assembled under seventeen main groups according to the Standard Industrial Classification.

In interpreting the statistics of individual industries it should be noted that the figures on employment, production, etc., do not refer to individual products but to all the products produced by an industry. For example, the value of production of the confectionery industry amounting to \$119,455,419 in 1956 does not imply that this was the value of confectionery produced. What it means is that the firms whose principal product was confectionery had a value of production of \$119,455,419. This figure, in addition to confectionery, includes all the subsidiary products made by these firms, such as chewing gum valued at \$10,031,150, ice cream which was valued at \$3,058,710, and bread and other bakery products valued at \$838,310. Confectionery is also produced as a subsidiary product by firms credited to other industrial classifications. The quantities and values of the principal individual commodities produced are given in Table 11. Commodities produced in small quantities are not included, but the list covers approximately 75 p.c. of total production.
