

**Consumer Price Indexes for Regional Cities.**—Table 7 gives regional consumer price indexes for ten cities or city combinations. These indexes do not show whether it costs more or less to live in one city than in another and should not be used for such comparison. Their function is to measure percentage changes in retail prices—over a certain time in each city or city combination—of a fixed basket of goods and services representing the level of consumption of a particular group of families.

**7.—Consumer Price Indexes for Regional Cities 1950-58, and by Month 1957 and 1958**

(1949=100)

Year and Month	St. John's, Nfld.	Halifax, N.S.	Saint John, N.B.	Montreal, Que.	Ottawa, Ont.	Toronto, Ont.	Winnipeg, Man.	Saskatoon-Regina, Sask.	Edmonton-Calgary, Alta.	Vancouver, B.C.

**World Retail Price Indexes.**—In order to place changes in Canadian retail prices in perspective with those occurring elsewhere, Table 8 provides retail price indexes for selected countries for 1956 and 1957. These indexes measure price change only within each country and should not be used to compare actual levels of living costs from country to country.
