

Subsection 5.—Production of Fuels

Coal.—The production of coal continued its downward trend in 1959, recording a reduction of 9.3 p.c. in quantity and 8.6 p.c. in value from 1958. Consumption was also considerably lower.

Increases in New Brunswick and Alberta were more than counterbalanced by decreases in all other producing provinces. Imports were also lower but exports showed a moderate improvement, increasing by 39.9 p.c. in quantity and 23.2 p.c. in value.

20.—Coal Production, by Province, 1950-59

NOTE.—Figures from 1874 are given in the corresponding table of previous Year Books beginning with the 1911 edition.

Year	Nova Scotia	New Brunswick	Saskatchewan	Alberta	British Columbia	Yukon Territory	Canada
