<sup>1</sup> Includes anthracite dust. <sup>2</sup> Includes coal ex-warehoused for ships' stores. <sup>3</sup> Canada also imported 191,134 tons of briquettes of coal or coke valued at \$2,316,570 in 1950; 170,157 tons valued at \$2,061,798 in 1951; 155,597 tons valued at \$1,868,619 in 1952; 128,673 tons valued at \$1,601,376 in 1953; 128,163 tons valued at \$1,583,610 in 1954; 124,216 tons valued at \$1,536,347 in 1955; 126,724 tons valued at \$1,581,699 in 1956; 73,306 tons valued at \$937,679 in 1957; 41,820 tons valued at \$536,344 in 1958; and 24,521 tons valued at \$321,149 in 1959.

### 22.—Exports of Domestic Coal, 1950-59

NOTE.—Figures from 1868 are given in the corresponding table of previous Year Books beginning with the 1911 edition.

The sources of coal consumed in Canada in the years 1950-59 are shown in Table 23 and detailed figures of coal made available for consumption in 1958 and 1959 are given in Table 24; the difference between the totals of the two tables in the same year is accounted for by the fact that coal received may be held in bond at Canadian ports and not cleared for consumption until required, and coal received in previous years may be taken out of bond (cleared for consumption) in a later year. Normally the coal made available for consumption is greater than the apparent domestic consumption as coal is landed at Canadian ports and re-exported or ex-warehoused for ships' stores without being taken out of bond but, while remaining in bond at the port, it is available for domestic consumption if required.
