

A summary of the capital expenditures in each province for the years 1958-60 is given in Table 5. Such expenditures represent gross additions to the capital stock of the province and are a reflection of economic activity in that area, but the actual production of these assets may generate its major employment in income-giving effects in other regions. For example, the spending of millions of dollars on oil refineries and pipelines in Western Canada means activity in the steel industries of Ontario as well as construction activity in the Prairie Provinces.

### 5.—Capital and Repair Expenditures, by Province, 1958-60

NOTE.—Actual expenditures 1958; preliminary actual 1959; intentions 1960.

(Millions of dollars)
