The interpretation of the symbols used in the tables throughout the Year Book will be found facing p. 1 of this volume.

Section 1.—Census of Population

This Section normally presents a limited summary of the voluminous data on population recorded by the Census of Canada. Such summary data resulting from the 1961 Census — Canada's tenth decennial census since Confederation—as was available at the time of going to press with this publication (mid-1962) will be found in Appendix II. Detailed census statistics and analyses will be published, as they become available, in census bulletins which are obtainable from the Queen's Printer or the Dominion Bureau of Statistics, Ottawa.

A list of the 1961 Census publications, with their prices and an order form, is available from the Dominion Bureau of Statistics on request. An indication of the type and content of those relating to population, households, families and housing follows; many of them will be published by the end of 1962 and the remainder in 1963.

PUBLICATIONS OF THE 1961 CENSUS OF CANADA*

Advance Series

These reports provide summary information on basic topics for which there is wide demand and are published at earlier dates than the regular series of volume reports. They cover: population by electoral districts; population by counties and census divisions; population of urban centres of 5,000 and over; rural farm, non-farm, and urban population; separate reports classifying population for counties and census divisions, and urban centres of 10,000 and over by age groups, marital status, origins, religious denominations, official language and mother tongues; immigrant population by periods of immigration and summary housing characteristics.

* Partial list only, dealing with population, households and families, and housing.
