<sup>1</sup> First admissions and readmissions.      <sup>2</sup> Mental hospitals only; does not include psychiatric or mental units in general hospitals.      <sup>3</sup> Tuberculosis hospitals only; does not include tuberculosis units in general hospitals.      <sup>4</sup> Includes other types not specified.

Radiology, clinical laboratory and physiotherapy facilities in public and federal hospitals are shown distributed by province and type of hospital in Table 11. Almost 90 p.c. of the hospitals reporting had radiology facilities and over 82 p.c. operated clinical laboratories but only 27 p.c. had physiotherapy facilities. Most general hospitals had radiology departments and a high proportion of tuberculosis hospitals operated both radiology departments and clinical laboratories.
