

**2.—Research-Development Expenditures for Work Done in Canada,  
by Major Industrial Group, 1957 and 1959**

Industrial Group	1957		1959	
	Amount	P.C. of Total	Amount	P.C. of Total
	\$'000		\$'000	
Transportation equipment.....	67,279	52.5	26,437	26.6
Electrical apparatus and supplies.....	14,457	11.3	16,021	16.1
Chemical products.....	11,748	9.2	14,244	14.4
<b>Totals.....</b>	<b>93,484</b>	<b>73.0</b>	<b>56,702</b>	<b>57.1</b>
Other industries.....	34,697	27.0	42,570	42.9
<b>Grand Totals.....</b>	<b>128,181</b>	<b>100.0</b>	<b>99,272</b>	<b>100.0</b>

Table 3 indicates trends in research-development expenditures performed within companies, by individual industry. To point up the fact that expenditure in all industries, other than transportation equipment, has increased from year to year and that, omitting transportation equipment, total expenditure has shown steady advance, the transportation equipment industry is given separately at the end of the table. It should be noted that electrical apparatus and supplies and chemical products industries account for more than 40 p.c. of the total outlays, excluding transportation, in all years shown.
