¹ Excluding canned meats. ² Included with beef. ³ Includes commercial lard production and estimated lard equivalent of renderable pork fat available from all uninspected slaughterer.

Section 5.—Agricultural Statistics of the Census

A summary of the agricultural statistics recorded by the Census of Canada is normally presented in this Section. Such summary data resulting from the 1961 Census as was available at the time of going to press with this publication (mid-1962) will be found in Appendix II. A complete list of Census publications, with their prices and an order form, is available from the Dominion Bureau of Statistics on request. It is expected that all reports in the Advance Series will be released by the end of 1962, and that the provincial reports in the Volume Series will be released by mid-1963.

PUBLICATIONS OF THE 1961 CENSUS OF AGRICULTURE

Advance Series

Reports in this Series provide published data at earlier dates than the regular series of volume reports and include data relating to the following: areas of field crops; numbers of livestock and poultry on farms; farm machinery and electric power; areas of vegetables, fruits, greenhouses and nurseries; area and use of farm land; a classification of farms by size, economic class and product type; farm woodlots. The Series will also include a bulletin giving a comparison between agricultural data for commercial farms and all farms as defined in the Census.

Volume Series

Reports in this Series represent the main results of the 1961 Census of Agriculture and may be ordered as separate provincial reports or in volume sets. These provincial reports are prepared in such a way that they may be combined within a hard-covered binder (provided with the set) to form the complete subject matter of each Volume.
