

# CHAPTER XIV.—MANUFACTURES

## CONSPECTUS

	PAGE		PAGE
<b>Part I.—Review of Manufacturing.....</b>	599	Subsection 1. Capital and Repair Expenditures.....	639
<b>SPECIAL ARTICLE: The Petrochemical Industry of Canada.....</b>	609	Subsection 2. Size of Manufacturing Establishments.....	640
<b>Part II.—Statistics of Manufacturing....</b>	615	<b>Part III.—Provincial and Local Distribution of Manufacturing Production.</b>	643
<b>SECTION 1. GROWTH OF MANUFACTURING...</b>	615	<b>SECTION 1. PROVINCIAL DISTRIBUTION OF MANUFACTURING PRODUCTION.....</b>	643
Subsection 1. Consumption of Manufactured Products.....	620	Subsection 1. The Manufactures of the Atlantic Provinces.....	652
Subsection 2. Value and Volume of Manufactured Production.....	621	Subsection 2. The Manufactures of Quebec.....	655
<b>SECTION 2. MANUFACTURED PRODUCTION VARIOUSLY CLASSIFIED.....</b>	623	Subsection 3. The Manufactures of Ontario.....	657
Subsection 1. Manufactures classified by Industrial Groups and Individual Industries.....	624	Subsection 4. The Manufactures of the Prairie Provinces.....	659
Subsection 2. Manufactures classified by Origin of Materials.....	635	Subsection 5. The Manufactures of British Columbia.....	661
Subsection 3. Manufactures classified by Type of Ownership.....	635	<b>SECTION 2. MANUFACTURING INDUSTRIES IN URBAN CENTRES.....</b>	662
<b>SECTION 3. PRINCIPAL FACTORS IN MANUFACTURING PRODUCTION.....</b>	639		

*The interpretation of the symbols used in the tables throughout the Year Book will be found facing p. 1 of this volume.*

This Chapter deals with manufacturing in Canada in three Parts. Part I reviews the changes in manufacturing production during the period 1945-59 followed by an outline of the manufacturing situation in 1960. It also contains a specially prepared treatise on Canada's fast-growing petrochemical industry. Part II provides general statistical analyses including manufacturing statistics from 1917; detailed treatment of production under various groupings and individual industries; and principal factors in manufacturing production such as capital expenditures and size of establishment. Part III deals with the provincial and local distribution of manufacturing production.

Figures for 1960 were available at the time of going to press for most of the tables of Part II, although certain analyses, such as principal commodities produced and manufactures classified by origin and type of ownership, were not yet complete and 1959 is given as the latest year. Similarly, 1959 is the latest year for all provincial and municipal analyses contained in Part III.

### PART I.—REVIEW OF MANUFACTURING\*

Canada is no longer on the fringes of industrialization but ranks among the world's most important manufacturing countries. The rate of expansion throughout the years has been phenomenal but in the past generation alone Canada has changed from a country producing and exporting mainly primary products to one that is increasingly producing and exporting manufactured goods. Today, manufactures account for about 26 p.c. of the value of all goods and services produced and employ a like percentage of the total labour force.

\*Except as otherwise noted, prepared by A. Cohen, Assistant Director, Industry and Merchandising Division, Dominion Bureau of Statistics.
