

Brunswick give a leading place to pulp and paper and sawmilling industries in the province. Other important manufacturing and processing activities are based on fish and agricultural resources, and there are also a number of metal working industries producing heating and cooking apparatus, brass and copper products, etc.

Considering the Atlantic Provinces as an economic unit, pulp and paper was by far the leading industry in 1960, having factory shipments valued at \$196,802,066. Fish products, with shipments valued at \$95,637,301 were in second place. Other industries, in order of importance and with shipments exceeding \$30,000,000, were: petroleum refining, iron and steel mills, sawmills and sugar refineries.

Manufacturing production in the Atlantic area has not quite kept pace with that in the more industrialized provinces of Ontario, Quebec and British Columbia. This is indicated by a drop in the Atlantic Provinces' share of the Canadian total shipments from 4.5 p.c. in 1951 to 4.0 p.c. in 1960. In number of persons employed there was a decrease of 6.3 p.c. for the Atlantic Provinces but an increase of 2.9 p.c. for Canada as a whole. Salaries and wages paid increased 40.8 p.c. for the Atlantic Provinces compared with 58.9 p.c. for Canada and selling value of factory shipments increased 28.5 p.c. compared with 44.9 p.c. for Canada.

3.—Statistics of the Leading Industries of the Atlantic Provinces 1960, with Totals for 1959

NOTE.—Based on the revised Standard Industrial Classification (see text on pp. 623-624).

Province and Industry	Estab-lish-ments	Em-ployees	Salaries and Wages	Cost at Plant of Materials Used	Value Added by Manufacture	Selling Value of Factory Shipments
