

MOVEMENT OF CRUDE PETROLEUM AND NATURAL GAS

↑
New Alberta pipeline completed in 1961 connects Kaybob oil field with Edmonton by 161-mile, 12-inch pipe. A layer of coal tar enamel reinforced with fibreglass protects the pipeline when buried.

←
The gas pipeline network continues to expand in Western Canada. Construction in 1961 included the completion of an extensive gathering system to serve the new giant gas-processing plant at Rimbey, Alta.
