

**Canadian Assets Abroad.**—While there has been a great growth in non-resident investment in Canada and in the balance of indebtedness to other countries, it will be noted that Canadian assets abroad, shown in Tables 22 and 23, have continued to rise in value each year. These now represent a larger proportion of liabilities abroad than was the case before World War II, but more than half of the increase since then has been in government-owned assets such as the official reserves and the loans by the Canadian Government to other governments which were extended during the war and early postwar years. At the end of 1961 the government credits outstanding had a value of \$1,380,000,000 while official holdings of exchange amounted to \$2,154,000,000 in terms of Canadian dollars. Other official Canadian assets include Canada's subscriptions to the capital of the International Bank, the International Development Association, the International Finance Corporation and the International Monetary Fund which, by March 1962, amounted to \$73,700,000,000, \$16,400,000,000, \$3,500,000,000, and \$564,700,000,000, respectively, a substantial part being offset by liabilities to these institutions.

The portion of the assets in private investments, particularly in the form of direct investments abroad by Canadian companies, is still small in relation to the corresponding non-resident stake in equities in Canada. Private long-term investments abroad by Canadians in 1960 were made up of direct investments of \$2,495,000,000 and portfolio investments of \$1,280,000,000. More than two-thirds of the privately owned investments were located in the United States. Direct investments in that country by Canadian businesses have grown rapidly and are found in many fields, among which the beverage and farm implement industries are particularly noteworthy.

Private investments in overseas countries are widely distributed. About one-half of the total in 1960 were located in Commonwealth countries, with slightly less in Britain than in the remainder of the Commonwealth. Most of the direct investments in Britain were in industry, while in other Commonwealth countries there were investments in mining and petroleum as well as in industry. In foreign overseas countries the largest part is in the countries of Latin America where Canadian holdings in public utilities are substantial.

## 22.—Canadian Assets Abroad, 1939, 1948 and 1955-60

*NOTE.*—Excludes investments of insurance companies and banks, Canada's subscriptions to international financial institutions and short-term assets, other than official holdings of gold and foreign exchange. Holdings of stocks are at book values as shown in the books of issuing companies; holdings of bonds are shown at par values. Foreign currencies are converted into Canadian dollars at current market rates. The series for portfolio investment was reconstructed in 1952 and is not strictly comparable with preceding years.

(Millions of dollars)
