<sup>1</sup> Used in farm butter only.<sup>2</sup> Includes values of skim milk and buttermilk retained on farms.

Butter production in 1962 amounted to 372,201,000 lb., almost 8,000,000 lb. more than in the previous year. The 1962 total included 361,498,000 lb. of creamery butter, 6,751,000 lb. of dairy or farm-made butter and 3,952,000 lb. of whey butter. The annual per capita consumption of creamery butter increased for the first time since 1956, moving from 15.81 lb. in 1961 to 17.26 lb. in 1962. Stocks on hand at the end of the year totalled 135,538,000 lb., the largest carryover on record; combined with the butter equivalent of butter oil stocks, the carryover was 238,138,000 lb.

Factory cheese production in 1962 was estimated at 130,178,000 lb., 0.9 p.c. lower than in 1961. Peak cheese production occurred in 1942 when the output was 207,431,000 lb. and peak exports in 1945 when they amounted to 135,409,000 lb. Exports of cheese, mostly cheddar, in 1962 amounted to 27,252,000 lb. compared with 19,508,000 lb. in 1961.
