<sup>1</sup> See footnote 1, Table 1, p. 646.  
p. 645.<sup>2</sup> Not strictly comparable with previous years; see third paragraph,

The figures in Table 3 trace the tendencies in manufacturing industries as clearly as possible from 1917 to 1961. In analysing statistics of production and materials used, price changes should be borne in mind, particularly the inflation of values in the years immediately following World War I, the drop in prices of commodities during the depressions following 1921 and 1930, and the increases again in World War II and the postwar period.
