#### PART IV.—FEDERAL AIDS TO DOMESTIC INDUSTRY

**The Department of Industry.**—In 1963 legislation was introduced into Parliament to establish the Department of Industry. On July 22, 1963, Royal Assent was given to the Department of Industry Act and, with the proclamation on July 25, 1963, the new Department came into existence. Under the Act, the duties, powers and functions of the Minister of Industry are "to include all matters relating to manufacturing industries in Canada over which the Parliament of Canada has jurisdiction, not by law assigned to any other branch or agency of the Government of Canada". The Department is responsible for promoting the establishment, growth, efficiency and improvement of manufacturing industries in Canada through the development and implementation of programs to assist manufacturers to adjust to changing market conditions, to help them develop new lines of production and enter new markets, and to promote greater industrial research and the utilization of technological advances within Canadian industry.

The Area Development Agency—part of the Department of Industry—is responsible for undertaking research and investigations into the means of increasing employment and income in designated areas, and the development and carrying out of programs to this end. The Agency administers the various Federal Government incentive measures intended to foster the economic growth of the designated areas.

In October 1963, branches of the Domestic Commerce Service of the Department of Trade and Commerce were incorporated into the Department of Industry. The functions of the Industrial Promotion Branch and the Industrial Design Branch were continued as part of the program of the new Department. The functions of the Small Business Branch were absorbed elsewhere and the special capital cost allowance program for new products came to an end on Dec. 31, 1962, eliminating the need for its administration.

**Industrial Promotion.**—The industrial promotion activities of the Department of Industry are designed to assist manufacturers and processors to expand operations in Canada. In pursuit of this objective, close liaison is maintained with other federal agencies, with provincial, regional and municipal bodies, and with private development agencies and business organizations and associations.
