¹ Although this is a metropolitan area, only St. John's proper is included in the building permits survey.

Table 15 shows the value of building permits, by province, for the years 1961 and 1962 and Table 16 the number of dwelling units covered by building permits in each province for the same years. The relative material was compiled from municipal figures and therefore varies with the terms of individual by-laws, with the methods of estimating the value of local construction and with other factors that may differ from area to area. Information is not available on the permits allowed to lapse without the relative construction being undertaken.
