

Gold.—Over the ten-year period 1954-63, Canada's annual gold production fluctuated narrowly between about 4,000,000 oz.t. and 4,600,000 oz.t., and its value between \$149,000,000 and \$159,000,000; the high point was reached in 1961. Output in 1963 was down by 200,000 oz.t. compared with 1962 and, despite the establishment of a higher price per oz.t. (see p. 546), the value was \$6,000,000 lower. All provinces except New Brunswick and Saskatchewan, as well as the Yukon and Northwest Territories, reported decreased output in 1963, the major producers—Ontario and Quebec—declining by 4.7 p.c. and 6.2 p.c., respectively. Ontario produced 58.5 p.c. of Canada's gold output in 1963, Quebec 23.4 p.c., the Northwest Territories 9.5 p.c. and British Columbia 3.9 p.c.

13.—Quantity and Value of Gold Produced, by Province, 1954-63

NOTE.—Values are calculated at world prices in Canadian funds. Figures from 1862 are given in the corresponding table of previous Year Books beginning with the 1916-17 edition.
