¹ Livestock billed through stockyards to country points outside province of origin.

² Movement to farms from stockyards and plants and shipments on through-billings from country points in one province to country points in another province.

Section 3.—Warehousing and Cold Storage

The available statistics on warehousing, normally carried under the heading of Warehousing and Cold Storage, include statistics of the licensed storage of grain; cold storage facilities without which perishable foods such as meats, dairy products, fish and fruits could not be exchanged or distributed on a wide scale, and stocks of food commodities on hand in dairy factories and cold storage warehouses at certain times of the year; storage of petroleum and petroleum products; public and customs warehouses; and bonded warehouses, which specialize in the storage of tobacco and alcoholic liquors and are under the strict surveillance of Federal Government excise officers.

In this issue of the Year Book, only licensed grain storage data and statistics of the warehousing industry are carried. Reference may be made to the 1963-64 Year Book, pp. 867-871 for information on the other types of storage and later statistics may be obtained from the following sources: cold storage and storage of food—Economics Division of the Canada Department of Agriculture; storage of petroleum and petroleum products—Public Utilities Section of the Public Finance and Transportation Division, DBS; customs warehouses—Port Administration Branch of the Department of National Revenue; and bonded warehousing—Industry Statistics Section of the Industry Division, DBS.
