Average age at death yrs.	43.1	44.8	51.5	53.4	56.3	58.7	59.7	63.1	60.5	64.1
Median age at death ² "	50.8	52.1	61.2	63.6	65.5	68.8	67.9	72.2	68.2	72.9

¹ Excludes the Yukon and Northwest Territories.

² The age above and below which half of the total number of annual deaths occurred.

Table 17 indicates the variations from province to province in average and median ages at death; these, in turn, are dependent in large measure on the age distribution of the population as well as on varying mortality rates at each age. For example, in Newfoundland a high mortality rate among infants and young children reduces the average and median age for that province, while the reverse is the case in British Columbia and several other provinces with older populations.
