

10,000 births delivered alive) to an all-time low of 165 in 1963. Since 1951 the rate of maternal mortality has been under 10 and since 1959 it has been under five. Despite this improvement, Canada's maternal death rate (3.5 in 1963) is higher than the rates for several other countries such as Sweden (2.1), Norway (2.1), Denmark (2.2) and New Zealand (2.9). Mortality among unmarried mothers is higher than among married mothers.

Causes of Maternal Deaths.—Table 24 shows the main causes of maternal deaths during the years 1961-63.
