¹ Based on estimated population as at June 1, 1964.

² Mental hospitals only; exclusive of psychiatric units in other hospitals.

³ Tuberculosis hospitals only; exclusive of tuberculosis units in other hospitals.

Information concerning the number of hospitals operating and their bed capacities (Table 5) was available for 1964 at the time of preparation of this Subsection but the most recent figures available for Tables 6 to 16 were for 1963.

Aggregate estimated admissions of adults and children to all types of hospitals in 1963 numbered 3,090,048 or 164 per 1,000 population compared with 161 in 1962, and admissions to public general hospitals represented 89.7 p.c. of the total. On any particular day in 1963, there were 177,300 persons (adults and children) in Canadian hospitals compared with 172,900 in 1962. The occupancy rate in public general hospitals, at 81.4 p.c., was down slightly from the previous year and that in tuberculosis sanatoria continued its downward trend to 67.0 p.c. from 70.0 p.c. in 1962. The rate in mental hospitals, however, increased from 105.8 p.c. to 108.4 p.c. in the same comparison.

6.—Movement of Patients¹ and Patient-Days in Operating Public, Private and Federal Hospitals, 1959-63

NOTE.—Figures include estimates for non-reporting hospitals.

Type of Service and Item	1959	1960	1961	1962	1963
	PUBLIC HOSPITALS				
General—					
Beds set up at Dec. 31.....	85,228	87,584	91,109	93,934	96,207
Admissions.....	2,450,825	2,529,949	2,646,022	2,682,310	2,771,403
