

Table 16 gives summary data on working conditions of plant and office employees in manufacturing industries for the years 1960-64 and also for all industries in 1963 and 1964. The percentages in this table denote the proportions that employees—plant or office—of establishments reporting specific items bear to the total number of all such employees in all establishments replying to the survey; they are not necessarily the proportions of employees actually covered by the various items.

Further details and additional information may be seen in the annual report *Working Conditions in Canadian Industry*, compiled and published by the Department of Labour and based on a survey at May 1 each year of some 20,000 establishments.

16.—Summary of Selected Working Conditions of Non-office and Office Employees in Manufacturing Industries, 1960-64 and All Industries 1963 and 1964
