*The interpretation of the symbols used in the tables throughout the Year Book will be found on p. viii of this volume.*

Canada's growth in recent years has intensified many problems in the planning of health and welfare services and has shifted the emphasis toward new approaches and new programs. General prosperity, growing urbanization and industrialization, larger numbers of children and older persons in the population, and new concepts and knowledge in health and welfare matters have all contributed to needs for additional services.

\* Except where otherwise indicated, this Chapter was prepared (July 1966) by the Research and Statistics Division of the Department of National Health and Welfare, Ottawa.
