Other.....	830	749
Other	714	672
Totals, Inland	19,592	18,964
Grand Totals	260,311	283,460

¹ Includes value of livers and liver products.

² Includes landings by Canadian fishermen in United States ports.

The annual output of canned salmon fluctuates considerably with the extent of the catch, as is shown in Table 6. This product has long been the most important of the industry, but the demand for Atlantic Coast frozen groundfish filets and blocks has been rising so rapidly that the value of these products now runs a close second. In fact, in 1960 and 1963, years of low canned salmon production, the value of the Atlantic products was in first place.
