

8.—Indexes of Volume of Manufacturing Production for Major Industry Groups, 1961-66

(Ranked according to 1966 percentage increase over 1965)
(1949=100)

Rank	Industry Group	1961	1962	1963	1964	1965	1966 ^a	Percentage Change	
								1964-65	1965-66 ^a
1	Electrical apparatus and supplies ¹	197.9	236.5	254.9	279.1	319.2	368.2	+14.4	+15.7
2	Miscellaneous manufacturing.....	292.3	302.0	353.0	386.5	407.3	449.4	+ 5.4	+10.3
3	Chemical products.....	250.3	262.9	282.5	312.7	344.7	377.7	+10.2	+ 9.6
4	Transportation equipment ¹	138.1	165.3	190.2	210.5	250.0	273.8	+18.8	+ 9.5
5	Paper products.....	156.7	163.7	170.1	186.3	198.3	216.1	+ 6.4	+ 9.0
6	Rubber products.....	158.6	182.5	207.4	232.8	237.4	258.5	+ 2.0	+ 8.9
7	Products of petroleum and coal.....	274.0	291.1	318.0	330.1	345.9	371.6	+ 4.8	+ 7.4
8	Printing, publishing and allied industries.....	180.4	189.5	195.2	207.4	223.3	239.7	+ 7.7	+ 7.3
9	Food and beverages.....	159.1	167.3	172.2	185.6	193.1	204.9	+ 4.0	+ 6.1
10	Tobacco products.....	210.0	220.9	225.3	232.1	243.4	258.1	+ 4.9	+ 6.0
11	Iron and steel products ¹	156.6	174.5	191.0	215.2	239.1	252.9	+11.1	+ 5.8
12	Textile products.....	152.1	167.7	188.0	203.3	220.6	233.0	+ 8.5	+ 5.6
13	Non-ferrous metal products ¹	156.3	158.8	159.8	174.2	186.9	195.6	+ 7.3	+ 4.7
14	Clothing products.....	134.8	141.9	150.3	163.4	171.2	178.6	+ 4.8	+ 4.3
15	Non-metallic mineral products ¹	213.2	232.5	235.0	268.2	286.9	296.6	+ 7.0	+ 3.4
16	Wood products ¹	144.9	158.6	167.3	174.3	181.7	186.0	+ 4.2	+ 2.4
17	Leather products.....	126.9	130.8	132.1	137.3	135.2	136.9	- 1.5	+ 1.3
	Totals, non-durable manufacturing.....	173.6	183.5	194.9	211.2	224.1	240.3	+ 6.1	+ 7.2
	Totals, durable manufacturing.....	158.9	178.5	192.9	212.7	237.2	254.7	+11.5	+ 7.4
	All Manufacturing Industries	166.9	181.2	193.9	211.9	230.1	246.9	+ 8.6	+ 7.3

¹ Durable manufactures; other groups are non-durable.

Industry Selling Price Indexes

The most comprehensive, regularly published estimate of price changes in manufacturing is an unweighted average of industry selling price indexes which is issued monthly. There are currently 102 such indexes, each based on prices of a representative "basket" of products of a particular manufacturing industry. (They thus relate to gross rather than net production as defined in connection with the volume of manufacturing production.) Although the average of these is not a scientific, weighted measure of price changes in manufacturing, it gives some over-all indication of the direction and extent of price movements. The unweighted annual average of industry selling price indexes (1956 = 100) is as follows for years which they have been issued:—

1956.....	100.0	1960.....	102.7	1964.....	108.2
1957.....	101.7	1961.....	103.0	1965.....	109.1
1958.....	101.4	1962.....	104.1	1966.....	111.8 ^a
1959.....	102.4	1963.....	106.7		

Subsection 2.—Distribution of Manufacturing by Province and by Metropolitan Area

Distribution by Province

Ontario and Quebec together accounted for 81.3 p.c. of the value added by manufacture in Canada in 1964—Ontario for 52.2 p.c. and Quebec for 29.1 p.c. British Columbia was responsible for 8.4 p.c., the Prairie Provinces for 6.7 p.c., and the Atlantic Provinces for 3.6 p.c. In Ontario, value added by manufacture averaged \$1,073 per capita of the population, in Quebec \$708, in British Columbia \$635, in the Prairie Provinces \$271 and in the Atlantic Provinces \$249; these averages compare with a national average of \$704.
