

by class of builder are approximations only. All estimates given for cost of materials used are based on ratios of this item to total value of work performed, derived from annual surveys of construction work and applied to the total value-of-work figures. Estimates of labour content are similarly based but, in addition, are adjusted to include working owners and partners and their withdrawals. Although the ratios were calculated in some detail by type of industry, still further refinements are required. There are also some difficulties in obtaining the precise location of projects undertaken or to be undertaken by large companies operating in a number of provinces. However, if used with these qualifications in mind, the table provides useful estimates.

8.—Labour Content, Cost of Materials and Value of Work Performed in Construction, by Province and by Employer, 1964 and 1965 with Totals for 1961-65

Note.—Actual expenditures 1961-64; preliminary actual 1965. Comparable figures from 1963 are given in the corresponding table of previous Year Books beginning with the 1967-68 edition.

Province or Employer and Year	Labour Content		Cost of Materials Used	Value of Work Performed	
	Number	Value			
		\$'000	\$'000	\$'000
