Totals, Immigrants.....	112,606	146,758	194,743

The number of female immigrants coming into Canada was higher than the number of male immigrants in every year from 1957 to 1964. In 1965, however, the trend was reversed, and again in 1966 the number of males exceeded the number of females in total. In the single category, males were predominant up to age 40, whereas in the married category females exceeded males by 1,954, in the widowed category by 3,001 and in the divorced and separated category by 348. Of all persons arriving in 1966 who were 15 years of age or over, 56.1 p.c. were married, 39.5 p.c. were single and 4.4 p.c. were widowed, divorced or separated.
