

**2.—Summary of Principal Vital Statistics for Incorporated Urban Centres of 20,000 Population or Over,<sup>1</sup>  
1965 with Average for 1956-60**

NOTE.—Birth, death and natural increase rates cannot be computed for 1965 or the period 1956-60 since urban centre populations are not known for intercensal periods. Figures for certain urban places may not be comparable for the periods shown because of changes in area boundaries, particularly for those indicated by an asterisk (\*). Urban centres are designated in this table by the following abbreviations: c.=city, t.=town, v.=village and d.m.=district municipality.
