Section 7.—International Comparisons of Vital Statistics

Table 34 gives a summary of Canada's national and provincial vital statistics rates along with those of several other countries. It will be noted that among the countries listed the low crude death rate in Canada is bettered by three countries—Japan, Venezuela and Union of Soviet Socialist Republics—and that some of the provinces have lower rates than most other countries. The birth rate also helps to give Canada one of the fastest growing populations, currently ranking tenth among those listed. However, 12 countries reported lower rates of infant mortality, some as low as 14 per 1,000 live births (Sweden and Netherlands), as compared with Canada's rate of 23.6.
