<sup>1</sup> Enrolments of full-time students under the various programs of the federal-provincial agreements, at Mar. 31, 1986. 3 See footnote 4. 4 Includes students from other Atlantic Provinces. 5 See footnote 5. 6 Includes enrolment in one school in Newfoundland and one in Prince Edward Island. 7 In addition, there were 19,485 vocational students in high schools not approved under Program 1 of the federal-provincial agreements. 8 Excludes 3,225 full-time students in one-year preparatory courses at institutes of technology and 1,385 in courses not approved under Program 2 of the federal-provincial agreements. 9 In addition, there were 7,586 part-time students and 132 students taking formal apprenticeship courses by correspondence. 10 In addition, there were 17,814 students in trade schools and 23,215 in business colleges taking part time courses, and 21,389 taking correspondence courses.

## Subsection 4.—Adult Education

Adult education benefits from a wide variety of sponsors, both public and private, but most important in this respect are government departments and agencies at all three levels. Although the Federal Government makes substantial contributions, provincial departments of education, of course, play the major role since education is a provincial responsibility. Total adult education enrolment in 1964-65 was 2,854,065; the apparent increase of 47.4 p.c. over the previous year is mainly accounted for by the inclusion, for the first time, of enrolment in informal courses conducted by health departments and agencies, which comprised 12.9 p.c. of the total. Government-sponsored classes accounted for 69.5 p.c. and universities and colleges (reported by 96 institutions) for 10.7 p.c.
