Type of Commercial Farms.—Commercial farms in the 1966 Census (census-farms reporting \$2,500 or more sales of agricultural products) are classified by product type in Table 49. A criterion of 51 p.c. or more of total sales was used for this classification. For example, a census-farm was typed as a poultry farm if 51 p.c. or more of the total agricultural sales for the farm was obtained from the sale of poultry products. However, it was classed as a dairy-type farm if 40 p.c. to 50 p.c. of total sales was obtained from dairy products, provided the sale of dairy products together with the sale of cattle and calves amounted to 51 p.c. or more of the total sales.
