¹ Includes working owners and partners. ² For 1924-51, inclusive, the value added by manufacture is computed by subtracting cost of fuel, electricity and materials from gross value of products; for 1952 and 1953 the deduction is made from value of factory shipments and for 1954 and subsequent years from the calculated value of production. Figures prior to 1924 are not comparable because statistics for cost of electricity are not available. ³ Prior to 1952, gross value of products. ⁴ A change in the method of computing the number of employees in the years 1925 to 1930, inclusive, increased the number somewhat over that which the method otherwise used would have given. In 1931, however, the method in force prior to 1925 was re-adopted. ⁵ Newfoundland is included from 1949 but figures for the fish processing industry for 1949 and 1950 are not available for that province and are not included.

11.—Summary Statistics of Manufactures, 1961-65

NOTE.—Based on the revised standard industrial classification and new establishment and total activity concepts. Figures in this table include poultry processors, book publishers, electroplating establishments, dental laboratories, and prescription branches in the ophthalmic goods manufactures industry, not included in Table 10.

¹ Conceptually identical to previous years. ² Cannot be reported separately for manufacturing and non-manufacturing activities but related substantially to manufacturing activity. ³ Included with administrative and office employees in Table 10. ⁴ Includes production and related workers, administrative and office employees, sales, distribution and other employees; excludes working owners and partners. ⁵ Includes supplies used in both manufacturing and non-manufacturing activity. ⁶ Includes shipments of goods of own manufacture, value of shipments of goods purchased for resale and other operational revenue. ⁷ Value of total operational revenue less total cost of materials, supplies, fuel and electricity used and goods purchased for resale in the same condition; all adjusted for inventory changes where required.
