Weekly Wages and Salaries.—Average weekly wages and salaries have increased substantially in the years for which current payroll statistics have been collected, rising from \$23.44 in 1939 to \$91.01 in 1965 and \$96.30 in 1966. The upward movement gained momentum after the end of the War and average annual increases from 1946 to 1952 were more than twice as great as those between 1939 and 1946. After 1952 the rate of increase, in terms of year-to-year percentage changes, fell slightly below that recorded during the war years, particularly between 1959 and 1962, when average earnings rose at rates of about 3 p.c. per annum. Over the next four years the rate increased moderately and earnings in 1966 were 5.8 p.c. higher than in 1965.
