

## Section 3.—Storage and Warehousing

This Section carries data on licensed grain storage and the public warehousing industry only. Information on other types of storage may be obtained from the following sources: cold storage and storage of food—Economics Branch of the Canada Department of Agriculture; storage of petroleum and petroleum products—Energy Statistics Section of the Manufacturing and Primary Industries Division, DBS; customs warehouses—Port Administration Branch of the Department of National Revenue.

**Licensed Grain Storage.**—Total grain storage capacity in Canada, licensed under the provisions of the Canada Grain Act by the Board of Grain Commissioners for Canada, amounted to 677,199,000 bu. at Dec. 1, 1965, the increase over the same date of 1964 being 4,102,000 bu. Greater capacity in Western country elevators accounted for the total increase plus a 265,000-bu. drop in other storage positions. The movement of grain in and out of storage during 1965-66 is discussed at p. 910; Table 26 gives the amount in storage at three dates during the year. On July 31, 1966, 57.9 p.c. of the licensed storage capacity was occupied as compared with 69.8 p.c. on the same date of 1965.

26.—Licensed Grain Storage Capacity and Grain in Store, Crop Years  
1964-65 and 1965-66

Crop Year and Storage Position	Licensed Storage Capacity	Canadian Grain <sup>1</sup> in Licensed Storage				Proportion of Licensed Storage Capacity Occupied
